50% Time Savings

• Based on research done using a panel of Malaysian Tax Professionals.
 • Times given are estimates only and may vary between assessments.
 • Times are based on a simple assessment with a small asset base.

BRASSTAX™

Tax is easy when you have the right tools!

Conventional

Spreadsheets allow individuals to design and use their own worksheets, leading to time consuming integration problems and potential differences in documentation standards.

Hand writing the Borang and Lampiran is very time consuming, labour intensive and requires additional review time to minimise errors.

Staff may forget to update calculations or introduce other errors which require additional time to resolve.

With BRASSTAX™

BRASSTAX™ eliminates integration related problems by storing data centrally and enforcing standards in both calculations and documentation.

BRASSTAX™ generates all documents, including the Borang C and Borang R with 100% accuracy within seconds. Documents can then be emailed to clients in PDF format, eliminating both the time and cost of using hand delivery services.

BRASSTAX™ ensures that all documents and calculations are correctly updated within the assessment year and provides unique visual indicators to alert you to changes between each year.

What Our BRASSTAX™ Users Say
